5G

A whole new world

Who are we?
We are
MYEK GLOBAL

MyEK

MYEK GLOBAL has strong technical strength and a global resource system,
which can provide customized intelligent service solutions for users around the world,
With the China's largest intelligent equipment supply chain,

ASEAN MASTER CLASS AWARDS 2019

Software & System Integration
Development Excellent

OUR CLIENTS

MYEK GLOBAL has a software research and development service team of up to 5000 people, which has independent robot production lines and leading drone manufacturing plants in many cities in China and Malaysia.

MYEK GLOBAL has a lot of 5G partners and customers, include Huawei、Eastsoft、CHNT and others all over the world.

we expect more industries to work together to create more applications .

A glowing 5G chip is the central focus, resting on a dark, intricate circuit board. The chip itself is a square with a complex pattern of gold-colored circuitry. The letters '5G' are prominently displayed on the top surface of the chip, glowing with a bright, warm light. The chip is connected to the surrounding board by a series of gold-colored pins or solder joints along its edges. The background circuit board is dark and textured, with numerous gold-colored traces and components visible, creating a sense of depth and technological complexity.

The 5th
Generation

IS
coming !

Through 5G applications,
we can master the city's big data in real time,
All changes can be instantly perceived,
such as traffic conditions,
community security, corporate GDP,
river water quality, urban infrastructure,
climate change

What impacts
human's
development?

developer

Is't Thinking?

Is't culture?

POINTS OF INTEREST

It's
technology
that
changing
the world

Our city
will be
more harmonious
and orderly

▶ 5G assists the government
in decision-making,
timely dispatches traffic,
detects pollution, identifies crimes,
prevents weather disasters, etc.,
and efficiently handles
government affairs.

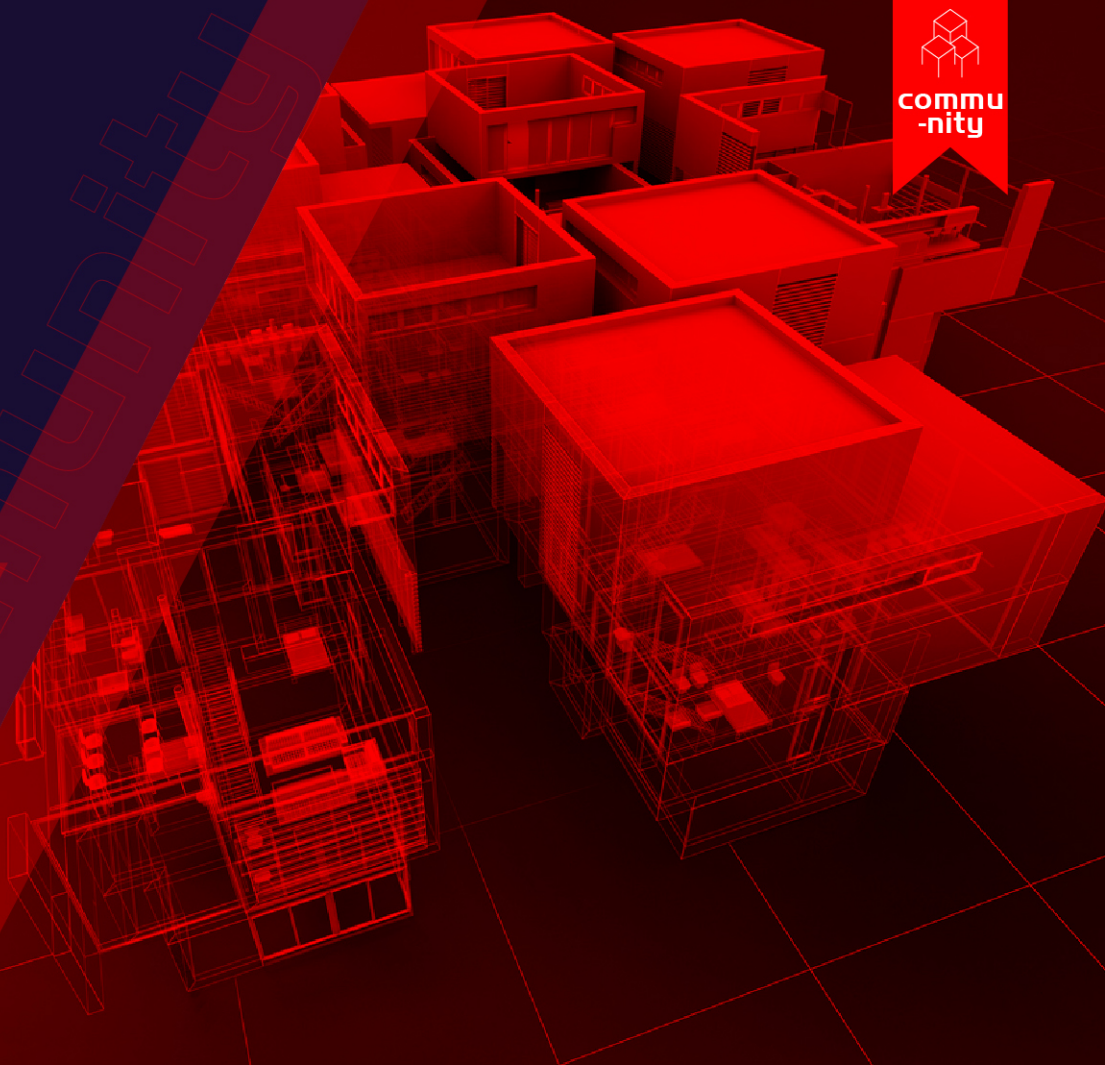

5G is a concern for the citizen,
It is a symbol of the credibility of the government,
A smart city is a place for people to yearn for.

Our community
will be
safer and more
comfortable

community

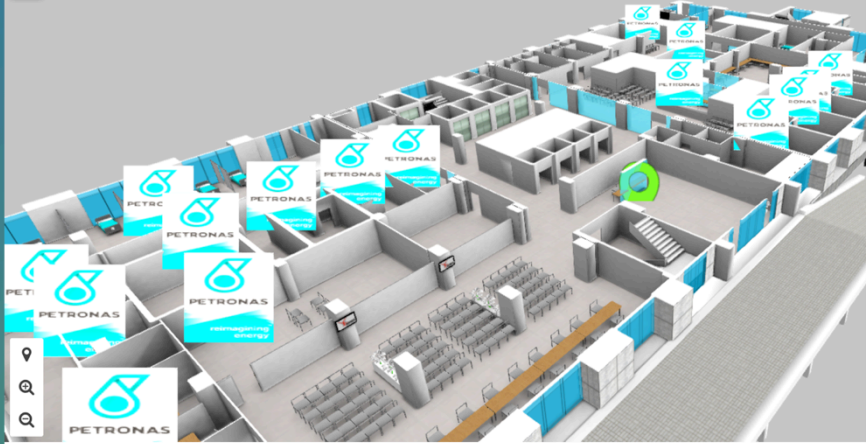

5G+ cloud technology can
timely monitor the community vehicles,
intelligently dispatch the parking spaces,
conduct the security
and attendance through face recognition,
It can monitor the status of elevators,
electricity meters, water meters, gas,
firefighting equipment
and other equipment online
to save management resources

- ▶ It can also macro-arrange vehicle routes to make urban traffic smoother, and real-time remote braking can reduce traffic accidents, Intelligent regulation can also reduce fuel emissions and protect the environment

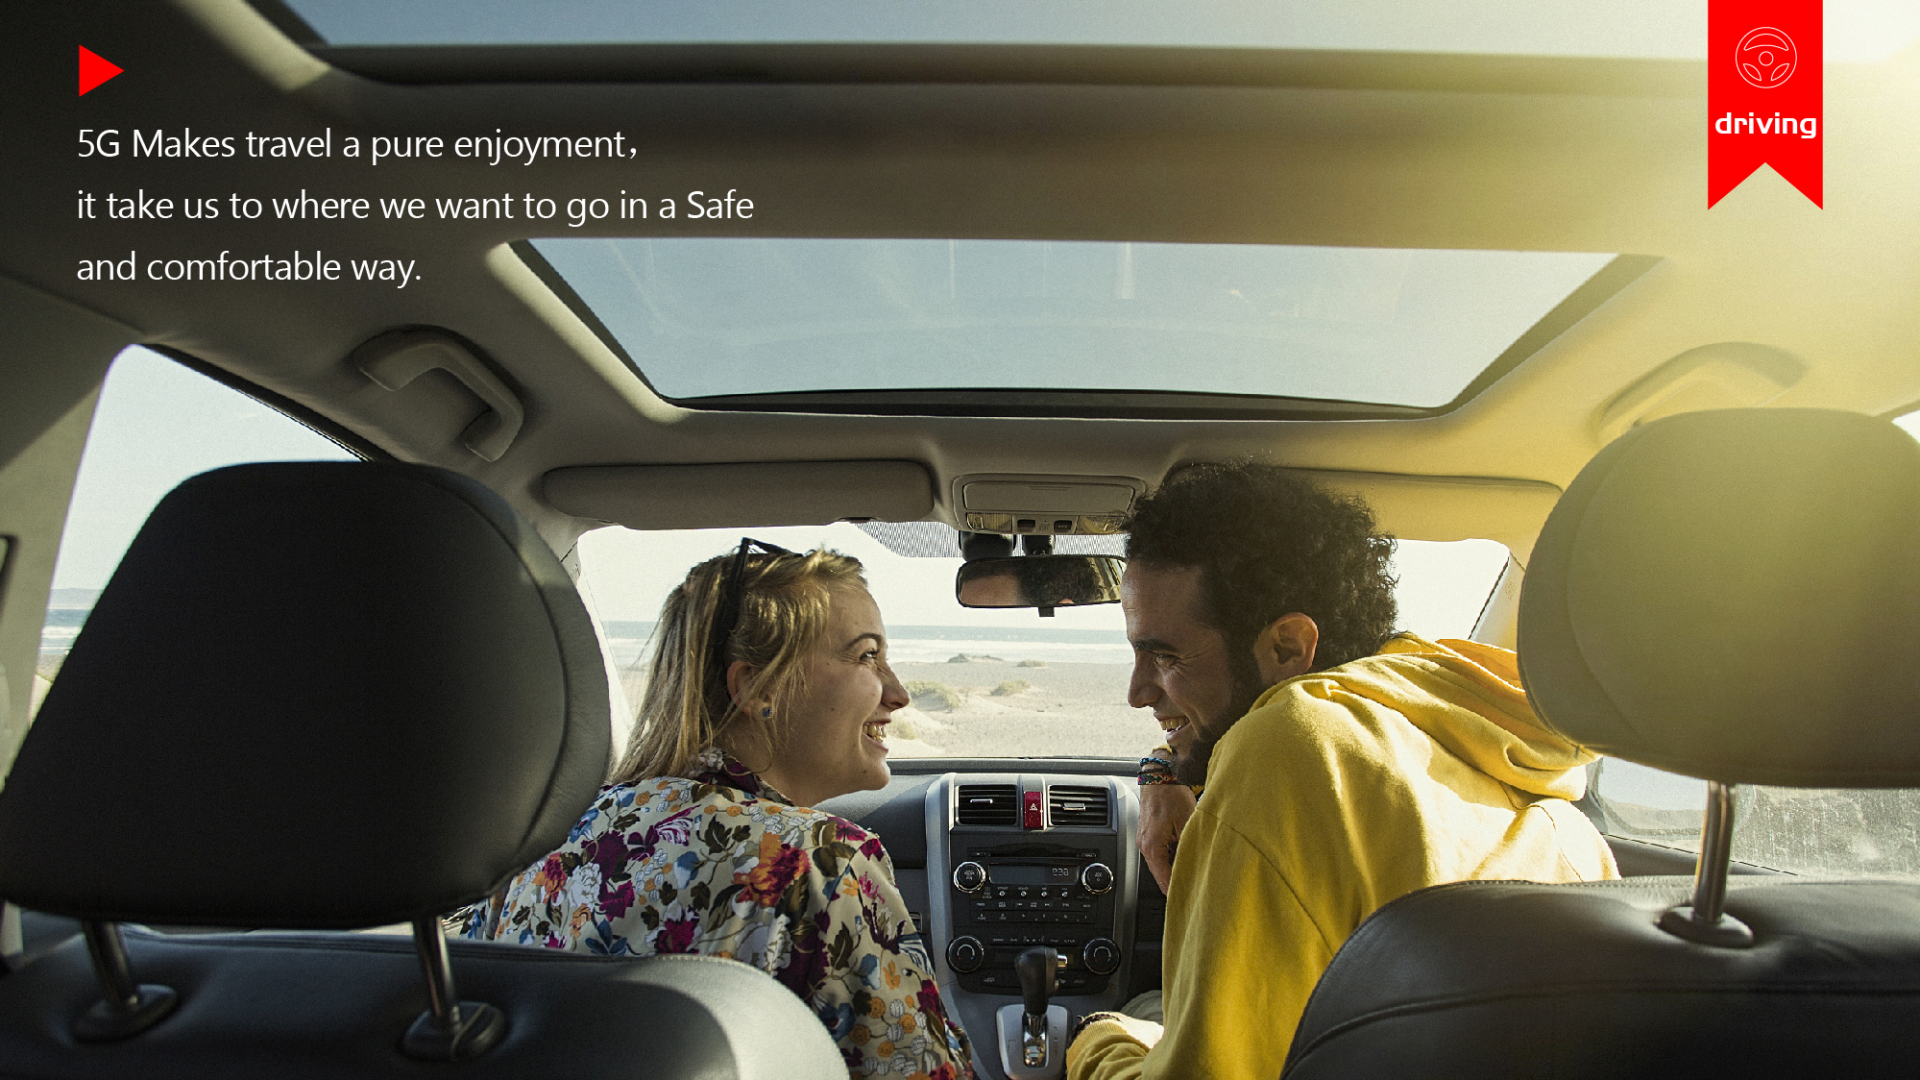

5G Makes travel a pure enjoyment,
it take us to where we want to go in a Safe
and comfortable way.

driving

Our factory
will be
smarter
and more
productive

5G+ cloud technology can control robots to realize unmanned production based on the online orders, Robot automatic production, vehicle automatic transportation, inspection robot monitoring equipment status at any time, remote collaborative maintenance.

5G can reduce labor costs
in manufacturing industry,
improve production efficiency
of enterprises
and promote the process
of Industry 4.0.

▼
5G makes production more controllable,
it connects factories with the market,
Customers participate in manufacture
to make what they want.

Our energy
will be
more stable
and
environmentally
friendly

5G

5G technology
can integrate solar energy,
wind power and hydropower
into existing power grids

Environmental protection energy
has intermittent shortcomings,
while 5G networks can intelligently
schedule different energy
complements through real-time data.

The reliability of power supply
in the power grid is as high as 99.99%,
which also promotes
more environmental protection
energy applications.

energy

energy

5G is the smart nerve of the power grids,
it helps to balance supply and demand,
Reducing transmission loss,
save the energy and our blue planet.

Infra-
structure

Our vision
will go
all the way

vision

5G+ unmanned aerial vehicle can control unmanned aerial vehicle to irrigate crops, monitor crop growth and realize agricultural automation.

Through lidar scanning, 5G unmanned aerial vehicles can also monitor natural gas pipeline leakage, inspect power lines, wind turbine blades, etc. to easily maintain the city's infrastructure.

Infrastr-
ucture

▶ 5G makes outdoor Infrastructure inspection no longer difficult, we can explore the unknown world without hindrance.

The background is a dimly lit room with a red color overlay. On the left, a large television is mounted on a wall, displaying a male doctor in a white lab coat and glasses, who is gesturing while speaking. To the right of the TV, a woman is sitting in a modern armchair, looking towards the screen with her hand near her chin in a thoughtful pose. The room has a minimalist design with shelves and a large window in the background.

Our medical education
will
reach further

medical education

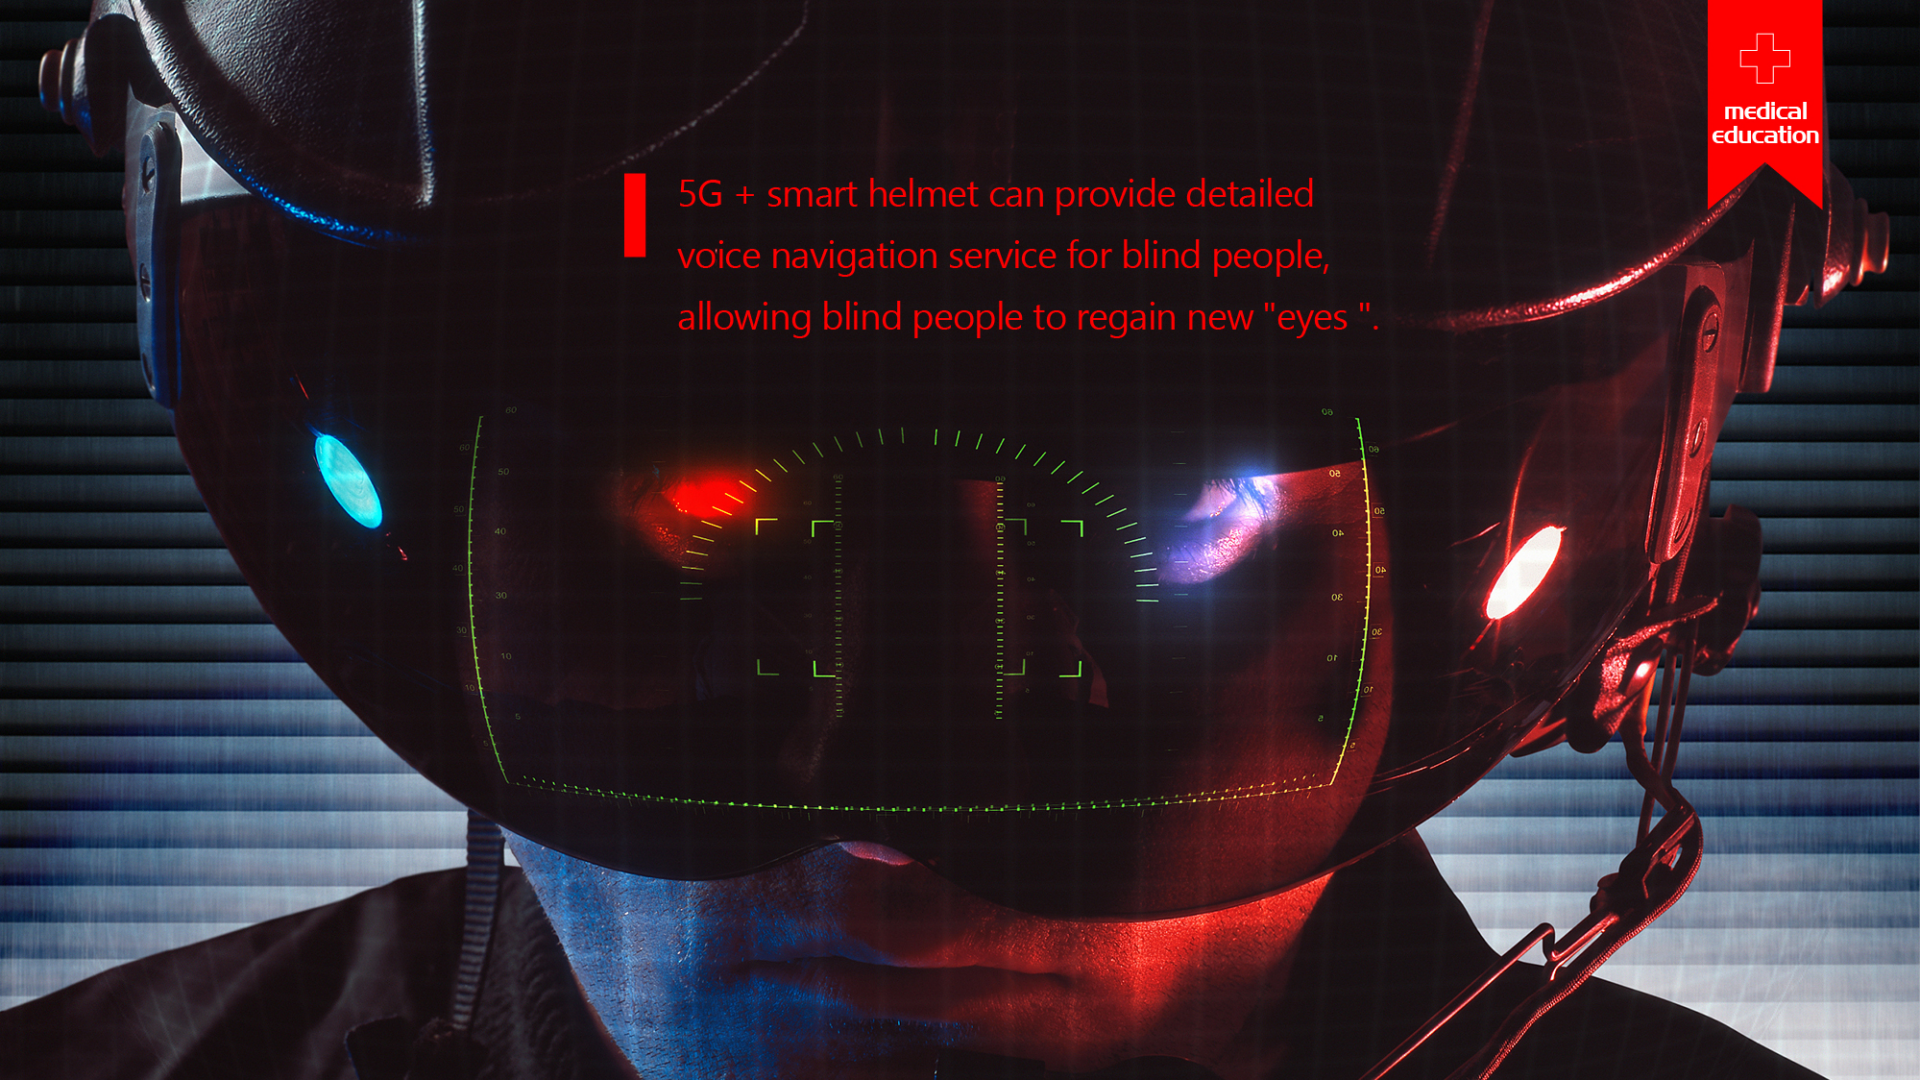

5G+VR technology can
achieve remote video diagnosis
and remote collaborative surgery,
which make medical resources
benefit everyone fairly,
Through 5G,
students in remote villages
can also watch
Miranda college's art classes
at any time.

medical

However, these dolphins swim up
in the springtime, which made
scientists

5G + smart helmet can provide detailed voice navigation service for blind people, allowing blind people to regain new "eyes".

5G brings care and hope to
where they are needed,
which make medical & education resources
benefit everyone fairly.

entertain
-ment

Our entertainment
will be
more realistic
and vivid

entertainment

entertain
-ment

A woman with long red hair is sitting on a dark leather sofa in a modern living room, wearing a VR headset and looking surprised. In the background, a large window shows a city at night. To the right, a large screen displays a virtual soccer game. A young boy in a white and red soccer uniform is in mid-air, kicking a ball. Another player in a yellow jersey is on the ground. The scene is set in a virtual environment with a dark, rainy sky and a field. The entire image has a red overlay.

5G+VR allows everyone to explore every corner of the world at any time,
Outdoor ultra-high definition panoramic live broadcast allows you to freely
choose the viewing angle 360 degrees,
Real-life shopping, real-life viewing, and real-life tourism are no longer ideas,
which is happening.

entertain
-ment

- ▶ 5G high bandwidth can broadcast 8K ultra high definition resolution video at any time to restore real images, Combined with AR technology, virtual images and real scenes can be superimposed to achieve an incredible game experience.

► 5G let us communicate with the world ,
exploring and Interaction ,
it will create more economic value
and cultural wealth.

entertain
-ment

A wireframe sphere is the central focus, composed of a dense mesh of white lines. It is surrounded by a complex network of thin white lines and small white dots, creating a sense of a global or digital network. Several circular icons are scattered around the sphere, each containing a different symbol: a sun, a gear, a target, a truck, a calculator, and a bar chart. The background is a dark, textured surface with a grid-like pattern of lines and dots.

5G is not just better it's different

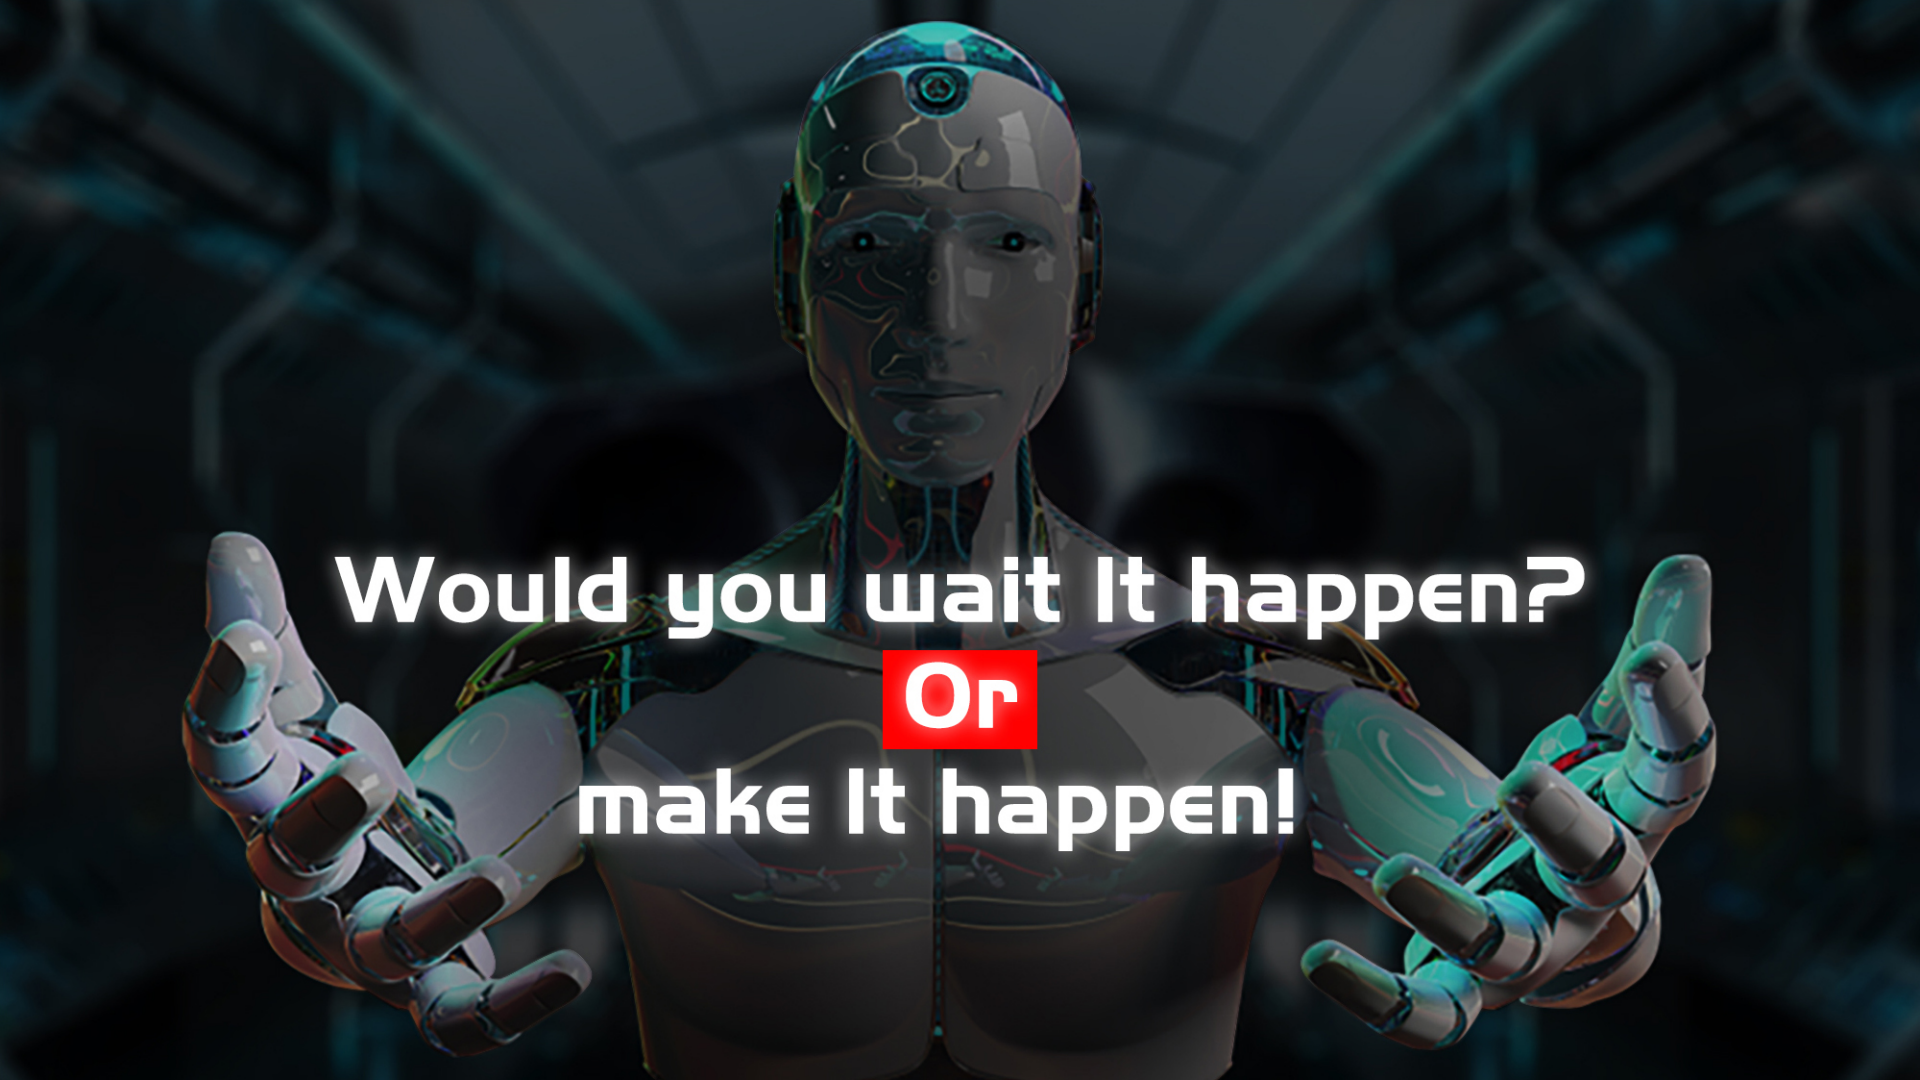

5G will change the status quo of many industries, so that government affairs, manufacturing, agriculture, energy, entertainment, medical care, and education will all be different.

5G is a brand-new productivity

which will bring
global technological innovation and have
far-reaching impact
on the economy and society

WAVE

**It is a new engine
of digital commerce,
which will bring
unlimited industrial value**

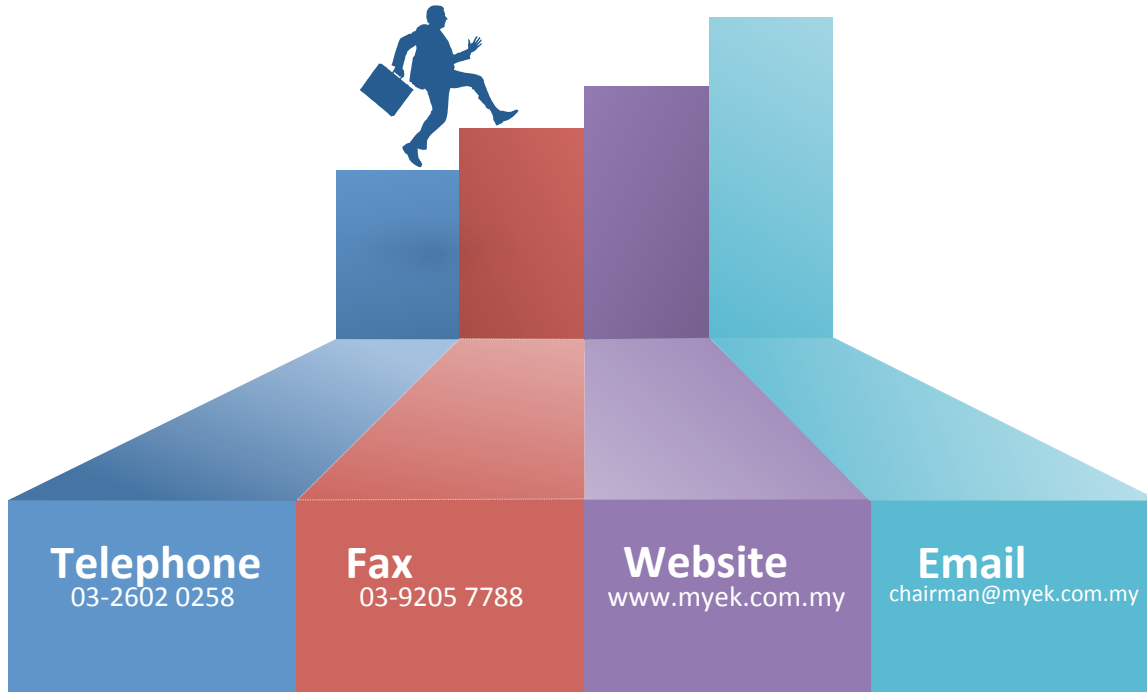

**Would you wait It happen?
Or
make It happen!**

Our Business

Proven solutions & track records in telecommunication industry

Focus

Who we are

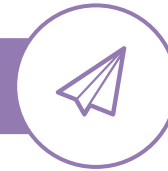

We are fresh, innovative and dynamic IT company.

Passion

Our Passion

On top of that the products we offer very affordable and effective to suit your business needs IT solutions, WIFI solution and HSBB(High Speed Broadband) is also available with our experience networking team.

Objective

What we do

We supply a wide range of IT Networking, computer products and software development services with the latest technology at the best value.

Range of products & services

IT solutions Hardware & Software

Mobile Apps Development

Web & database development.

MyKAD reader and solutions.

WIFI solutions

Structure cabling (BRI, PRI, FIBER OPTIC, LAN,

WAN and WIFI)

Artificial Intelligence in Smart Camera Surveillance

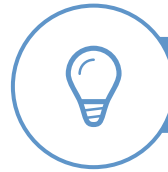

Value Partnership

Our extensive experience of Site Acquisition &

Procurement, Project rollout management &
